IRAKOZE BELINDA

Junior Full-Stack Software Engineer · Python · Django REST Framework · React · TypeScript

+256 761 714 327 | belindairakoze37@email.com | GitHub | LinkedIn | Portfolio | Kampala, Uganda

PROFESSIONAL SUMMARY

Software Engineering apprentice at Refactory Academy with hands-on experience developing web applications, REST APIs, and application features through individual and collaborative projects. Experienced with Python, Django, Django REST Framework, React, and TypeScript, with practical knowledge of relational databases, API testing, and Git. Interested in building reliable, user-focused software across frontend and backend systems.

EDUCATION & CERTIFICATIONS

Qualification	Institution	Year
• Software Engineering Apprenticeship / Training Program	Refactory Academy	Expected Dec 2026
• Uganda Advanced Certificate of Education (UACE)	Completed	2023
• Certificate in Software Engineering (CSE)	Completed	2026

TECHNICAL SKILLS

Frontend: React, TypeScript, Tailwind CSS, HTML, CSS.
Backend: Python, Django, Django REST Framework, REST API development.
Databases: SQLite, PostgreSQL, relational database concepts.
Testing & API Tools: Pytest, Postman, Swagger/OpenAPI.
Development Tools: Git, GitHub.
Core Concepts: CRUD, authentication, authorization, JWT, API testing.

INTER-PERSONAL SKILLS

Communication · Team collaboration · Problem-solving · Adaptability · Willingness to learn

EXPERIENCE

Software Engineering Apprentice *2026–Present*
Refactory Academy

- Develop web application features and REST API functionality through individual and collaborative software projects.
- Collaborate with other developers using Git branches and GitHub-based workflows.
- Apply software engineering practices including database design, API testing, and API documentation.

PORTFOLIO PROJECTS

AgriSmart Platform *github.com/belindairakoze37/AgriSmart-Platform*
Agricultural Technology Platform

- Contributed to an agricultural platform designed to support farmers with market information, agricultural advisory services, and marketplace functionality.
- Worked with a Django REST Framework backend and React web and React Native mobile applications.
- Contributed to mobile features including authentication, market prices, advisory chat, marketplace browsing, and profile functionality.

Technologies: Django REST Framework, React, React Native, Expo, TypeScript, Git

GreenHill Schools — Incident and Service Management Platform (ISMP)
Backend Contributor · Team Project

- Contributed to Django REST API development for incident tracking and service management.
- Worked on authenticated incident-history functionality and API behavior involving ticket data, filtering, pagination, and access control.
- Wrote and maintained automated API tests using Pytest and collaborated through Git branches and API schema documentation.

Technologies: Python, Django REST Framework, Pytest, Git, OpenAPI

Nyondo General Hardware Management System *github.com/belindairakoze37/Nyondo-General-Hardware-LTD-Project*
Individual Django Project

- Developed a Django-based web application for a general hardware business.
- Worked with Django models, views, templates, and database migrations.
- Used Git for version control during development.

Technologies: Python, Django, SQLite, HTML, CSS, Git

Languages: English And Luganda
